STANLY'S LETTER-Gen. Scott.-The Bas on Atlas thus refers to the letter of the Hon, Edward Stanly, and the posi tion and popularity of General Scott. It

*Mr. Stanly puts his case strongly, and his logic is unanswerable. His letter will do much good, both North and South, as it will tend to place the Presidential question in a proper form before the Whige of the whole country. Now, then, one word in conclusion. Mr. Stanly says that Gen. Scott was in favor of the "com promise measures." We have on doubt of that fact, the Whigs of the North have no doubt of that fact; and yet they will heartly support him if he is nominated, and give him such a vote as has not been given for a Whig cambidate since the campaign of 1840 The Whigs of the North do not wish the Compromise easures to be dragged into the canvass. They do not ask for a candidate who is opposed to them. The strength of Gen. Scott upon these points, is in the fict that although he was in favor of the mpromise himself, he does not there e repudiate and insult those who diff from him on these questions. He is put for narrowing the Whig platform, and crowding every good Whig off of it, who does not discern clearly the wis dom and benificence of the Compromise measures. It is the liberality of his opinion, it is the broad nationality of his character and his life that cause men to cleave to bim, and which commands from them confidence and respect."
